|  | 693587 | Mirror Frame 12 sq ft to 16 sq ft |  |

## How to Measure for Mirror Frame Kits:

Mirror Frame Kits are sold by the square foot with part numbers representing a range of frame sizes to simplify the order process. To determine the correct square footage needed, multiply the height and width of your mirror.

Example: $(24 \mathrm{in} \div 12)=2 \mathrm{ft} \quad(48 \mathrm{in} \div 12)=4 \mathrm{ft} \quad(2 \mathrm{ft} \times 4 \mathrm{ft})=8 \mathrm{sq} \mathrm{ft}$
(Round up to the closest square foot)
Mirror Frame Kits are represented by a part number depending on the overall square footage needed.
Example: 1 sq ft up to $4 \mathrm{sq} \mathrm{ft}=693580,4 \mathrm{sq} \mathrm{ft} \mathrm{up} \mathrm{to} 9 \mathrm{sq} \mathrm{ft}=693583$, etc.
(See list above)
